### **UNIVERSITY OF SALFORD**

MSc, Procurement, Logistics,  
and Supply Chain  
Management  
2020 - 2021

### **BHARATHIAR UNIVERSITY**

MBA, Human Resource  
Management  
2017 - 2019

### **IGNOU UNIVERSITY**

BA, English  
2014 - 2019

As a front-end developer with self-taught skills in HTML, CSS, JavaScript, and React.js, I have developed mini and main projects that showcase my ability to create engaging and responsive web applications. I am passionate about web development, continually learning and applying new techniques. My hands-on experience and commitment to delivering high-quality work prepare me to contribute effectively to a dynamic team and bring innovative web solutions to life.

## MAIN PROJECT

### E-COMMERCE WEBSITE

I developed an e-commerce website named Shopper, hosted on Firebase, featuring a user-friendly interface for browsing and purchasing products. Key functionalities include adding items to the cart, calculating total cart values, and removing products. The site also supports user account creation and categorizes products for men, women, and kids, showcasing my skills in building responsive and interactive web applications.

### MINI PROJECTS

I have developed several mini projects to enhance my skills in React.js and JavaScript. This includes a Netflix Clone using React.js and Firebase, featuring a dynamic home page for trending movies, a login page with authentication, and a media player integrated with the TMDb API. I also created a to-do list app, a stopwatch, and a digital clock using React.js, along with a weather app, an image slider, a rock-paper-scissors game, and a temperature converter in JavaScript. These projects demonstrate my proficiency in building interactive applications with both technologies.

## WORK EXPERIENCE

### • **Word Press Developer**

LSDP productions, Kadavanthra, Cochin.  
May 2024 – Current

### • **Customer Service Assistant**

Freij World Attractions, Liverpool  
January 2023 – January 2024
